

LAKEFRONT TRAIL PATHWAY SYMBOL REFERENCE GUIDE

	Pedestrian trail lane-use		Bike trail lane-use
	Through lane marking reinforces direction of travel		Two-way "LOOK" marking indicates to pedestrian trail users to look in both directions prior to crossing bike trail
	"SLOW" marking indicates to bike trail users to reduce speed		Green colored pavement marking with bike lane symbols reinforces bike lane-use at major intersections
	Double directional lane-use arrow marking indicates trail sections where there is bi-directional pedestrian use		Diagonal buffered marking reinforces the separation between the bike trail and pedestrian trail
	Dashed yellow centerline marking identifies areas where passing is permitted		Solid yellow centerline marking identifies areas where passing is discouraged
	Speed reduction markings identify locations where bike trail users need to slow down in advance of an unexpected trail feature		Bike trail marking combined with "sharrow" pavement marking is used in "shared trail" sections of the Lakefront Trail (where bicyclists and pedestrians share the same paved area)
	"Three Bands" marking identifies a secondary trail connecting to the Lakefront Trail. Secondary trail users shall yield the right-of-way to Lakefront Trail users before entering/crossing		Reference marking indicates the northing/southing of the Chicago street grid (typically spaced every "100" block)
	Yield triangles identify an approaching intersection and indicate to trail users to yield
